The first few releases of AutoCAD for personal computers (PCs) were referred to as Windows 3.x versions. The first major release of AutoCAD, dubbed AutoCAD '95, was based on Windows NT, and was released in the fall of 1994. The following year, AutoCAD '96 for Windows 95 was released. AutoCAD '98 was the first release for Windows 95/98. AutoCAD '02/'06 was based on Windows XP, and AutoCAD '12/'16 was based on Windows 7/8.5. The '97 releases supported the CAPI (Clipboard Access Programming Interface) API, which allowed AutoCAD to interact with the Windows Clipboard for file operations. The '98 and later releases did not support the CAPI API, but it is still supported in AutoCAD for Mac, which is based on the Carbon API. The latest major release of AutoCAD is AutoCAD LT 2016, based on Windows 10. AutoCAD LT 2018 for Windows 10 is available as part of the Microsoft Office 365 subscription. The latest major release of AutoCAD for Mac is AutoCAD 2018 for Mac, which is based on macOS 10.13 High Sierra. The latest major release of AutoCAD for iOS is AutoCAD Lite, which is available as a free app for Apple devices running iOS 11 or later. The following table lists all the major releases of AutoCAD since the first release, AutoCAD '95. The first AutoCAD to have an official development name (ADN) was AutoCAD '96. AutoCAD '97 is also considered to be a new release, but it was a minor release. AutoCAD 2008 and later are considered to be part of the same release. The version numbers for major releases are based on the AutoCAD release schedule, and are not the same as the ACDSee version numbers. Version numbers for minor releases are based on AutoCAD's schedule and are not the same as ACDSee's version numbers. AutoCAD releases have not been updated for macOS, so there is no version number for the macOS release of AutoCAD and none will be needed. Release history AutoCAD has been released every year since it was first released as AutoCAD '95. To avoid name conflicts with other CAD programs, the last digit of the AutoCAD
