I have a simple postgres 9.2 database which has 20 rows in one table which has a single integer column named "a". I'm trying to find the average of this column, but the query I use is taking a long time. The table has an index on the column. I'm using the following query to find the average of the column: SELECT avg(a) FROM myTable; And it takes about 36 secs to return. I then tried a query that uses a SQL JOIN, and a query that uses a subquery
