Kurzweil PC3 SoundEditor [Mac/Win] [2022-Latest]

SoundEditor is a fully featured Editor/Librarian and Sound Development tool for the Kurzweil PC3 series keyboard. While the PC3/PC3X is fully editable from its front panel controls, SoundEditor greatly expands the editing experience by displaying every PC3 parameter in a series of logical, easy-to-use graphical interfaces. SoundEditor allows you to create, edit, organize, and store PC3 Programs, Setups, Songs and Effects. Through a standard MIDI connection (DIN or USB), SoundEditor can receive and transmit individual Programs, Setups or Effects, or entire banks to the PC3. All Program, Setup Effect and DSP parameters can be displayed and edited. Programs can be assigned to any of 20 Categories to assist in organizing, sorting and creating custom program banks. SoundEditor can also be used as a teaching tool to learn the inner details of the factory Programs. Give Kurzweil PC3 SoundEditor a try to fully assess its capabilities! All About Tones In this lecture I'll show you the nuances of tone-painting using the PC3X's Polyphony to its maximum potential. I'll start with the PC3's unique and efficient mechanism for generating and sustaining tones, and show you how to use the PC3's powerful Polyphony to generate and sustain tone in new ways. This polyphony is shown to be useful not only as a tone generator, but also as a tone sustain effect. Finally I'll show how to use the dual input jack to mix, re-balance, invert, and then deliver the output as mono, or stereo. I'll then show you how to assign the characteristics of your unique tone to one of 20 unique

Kurzweil PC3 SoundEditor

The SoundEditor Software is a full-featured PC3/X Editor/Librarian and Sound Development tool for the Kurzweil PC3 series keyboards. Kurzweil SoundEditor software provides both a graphical interface to edit and display the 20 PC3 parameters and an XML formatted interface to export all PC3 parameter settings to the internal PC3/X firmware and to receive and display all PC3 parameters back from the PC3/X. Program Banks SoundEditor allows the user to organize the PC3/PC3X parameters into Program Banks. Like Categories, the number of program banks can be as large as desired. Program Banks are made up of several Banks. Each Bank is a logical grouping of all the parameters that are related to the same function. For example, a Piano player might create a few program banks to play a little piano on one PC3 (PC3) or a little organ on another PC3 (PC3X). [...] Program Bank Settings The settings for each program bank can be changed. This is done by going to the Category Settings, and then clicking on the bank. The settings are: Volume, Gain, and Pan. In the Category Settings, there is also a list of every program bank, and if necessary, you can create a new Bank or delete an existing bank. The Settings dialogue is shown in the screenshot below. By default, the piano player creates a Bank named Piano. This Bank is loaded with all the parameters pertaining to a piano. [...] Program Programs The Program Bank allows the user to load all or some of the Programs and Setups. The user can also create a new Setup or Program for each program bank. SoundEditor allows the user to work with a single Program or Setup, or create as many as needed. [...] Setups Setups are a collection of programs that are frequently used together in a single bank. Like Programs, the user can select all or some of the current Setups to load into a bank. [...] Programs A Program is similar to a Setup, except that a Program is a single individual Program. Generally, a Program will not contain Setups, but instead can be simply loaded into a bank to be used with all Setups in that bank. [...] Effects Effects are one of the most powerful features of the PC3/X, and SoundEditor greatly expands the
