How fast is your connection? If you are planning on streaming content like video or music, you may want to consider your device's connection speed in determining which type of network to use, so that you don't overburden the network. What type of device are you connecting? You can connect multiple kinds of devices to a network, but each one of them should meet certain requirements. Depending on the device type, the amount of hardware in the device and the amount of data that the device would transfer during use, a Wi-Fi network connection may or may not be the best choice for that particular device.
