Consider the following pseudo-code: template T& GetMember(T* thisPtr, const std::string& path) { return thisPtr->operator->(); } The idea here is to be able to call GetMember with a pointer to a method of type T. How to do it? The operator->() is not an appropriate operator overload for the return type. I tried to use references, const_casts, move constructions, and what not, but all ways I have tried so far resulted in the compiler complaining "does not match" (e.g. no matching function call to 'std::move(__x)' for 'const T'). The return type also needs to be a reference, obviously. I have some constraints. The thisPtr argument is not known at compile time. i.e. the return type is auto. The return type may be a temporary - i.e. it needs to be something like T or T&. The caller of GetMember needs to be able to pass a mutable pointer to a method of type T. I.e. the caller doesn't have to know that thisPtr points to a mutable object, and it isn't guaranteed that it actually does - that depends on the actual implementation and the correctness of the code. This is what I've tried so far: First thing I thought of was a template alias. I.e. this: template using Add

How To Install and Crack Atari Vault:

- **The best place to get free, clean games is one of the major gaming Web sites in the world: The Internet Archive. Simply save the Atari Vault file as a WMV, MPEG, AVI, Flash, Ogg, or other video file. Now that you've got your file, open it in the program of your choice (i.e., Windows Media player for Windows, FFMPEG for Mac, VLC for Linux). Once it's running play your game from the disk.**
- **Now that you've got your game loaded, throw a boot disc in your drive. Start up your PC, Windows or Mac.**
- **Attach the boot disk, and start up your computer. After it loads up and starts displaying the DOS screen, just tap the left control key.**
- **A menu should pop up. Select the Atari Vault file, and then hit return.**
- **Toward the bottom of the "Atari Vault" screen, hit "Boot".**
- **Use your favorite Atari 2600 joypad (or Apple II**

computer) to select and load up one of your several free games!
