The Plug-in Framework is used to develop AutoCAD plugins that extend or augment the functionality of AutoCAD. This consists of the Autodesk Plug-in Framework SDK (autocad_stdv8.dll, autocad_stdv8.lib) and Autodesk Plug-in Framework for AutoCAD (autocad_plugv8.dll, autocad_plugv8.lib). A number of AutoCAD plugins are available in the Autodesk Exchange Apps application store. In addition, there are two applications that extend AutoCAD from within AutoCAD. The Plug-In Manager and, more recently, the Plug-In Manager for AutoCAD (plugman.exe). These allow use to quickly and easily install plugins, which are stored as ZIP files. In 2010, Autodesk released the Embarcadero RAD Studio.NET runtime, which can be used to write plug-ins. Several AutoCAD third-party application products also include their own plug-ins. Autodesk Exchange Apps (AutoCAD 2012) Autodesk Exchange Apps (AutoCAD 2012) was a program that launched in AutoCAD 2012 which allowed users to share add-on applications with other users. It could also be used to upload and download add-on applications to the AutoCAD Application Store. The Autodesk Exchange Apps application requires a Windows 7 machine, as a minimum. AutoCAD 2012 was released for free trial and will continue to be free until April, 2017. It is the only free AutoCAD application that will run on a Windows Vista computer. AutoCAD Architect In February, 2011, Autodesk announced the release of AutoCAD Architect. The program allows engineers to design and develop high-end building and infrastructure projects. It has been designed to assist in the process of preparing a building project for the Autodesk EBIS project for the U.S. Army Corps of Engineers, in addition to other potential U.S. Government opportunities. The program is available for use free of charge. AutoCAD Architect can be used to create 3D models of architectural designs and can also edit and place 2D drawings.
