Between 1985 and 1993, 739 patients underwent cardiac surgery in our institution, and 16 were operated on after massive pulmonary embolism. The mean interval from massive pulmonary embolism to surgery was 1 week (range 1-17) and the most common surgical procedure was coronary artery bypass grafting. Three patients had a modified Bentall procedure, 3 had mitral valve replacement, 2 had aortic valve replacement and 1 underwent coronary artery bypass grafting and aortic valve replacement. Three patients had cardiopulmonary bypass (CPB) for 1 hour and the remaining 9 had CPB for 2 hours or less. The postoperative mortality was 6.2% for low-risk patients and 75.0% for high-risk patients. The cause of death in the high-risk group was not related to pulmonary embolism, but was related to myocardial depression. These cases underscore the potential severity of pulmonary embolism and the need for prompt diagnosis and treatment. Pozleć na Zalog Pozleć na Zalog ("Look at Log") was a Serbian television quiz show. It began broadcast in 2002 and is the first television show in Serbia. The show is the first and only nationally broadcast quiz show in Serbia with a team of two teams. The show aired every day at 10:30 PM on RTS. Format The format includes all the principles of the popular quiz, with the exception of "logic and deduction". The competitors had to answer a series of questions related to the subject (usually in the form of multiple choice or word) in the shortest amount of time. The main difference between the show and other, mostly European-based quiz programs is that the "logic" part of the show had no weight (number of correct answers had no effect on the win), not to mention the fact that the total time a question is not fixed, so the time limit to answer it is not limited, and there is a definite time limit (30 seconds) to answer it. The show is also the only quiz show in the world with the concepts of being "blocked" and being "quizz 0cc13bf012
