NexentaStor CMS is a web-based content management system (CMS) that allows organizations to build their own custom websites and online stores. This application allows you to import available articles from both Nexenta and Caxiwhar and the ones that you create as well. It also allows you to download articles in EPUB, MOBI, PDB, PDF, and XML format. In addition, it supports the following file types: To import available articles, you just need to enter the EPUB or PDB URL. Additionally, you can import articles created by your own employees from a CSV or TXT file. If you don't want to re-import your old articles, you can export your content in the XML format. Finally, if you want to copy your articles that are currently installed on your website, you can use the Updater to do it. NexentaStor CMS comes with a generous help guide that should help you gain a better understanding of how this application works. And again, you can access all the help information by opening this support page on our website. This is a free download
