Photoshop's History Photoshop has come a long way since its introduction in 1987 as Adobe's flagship product. The first version of Photoshop was a 12-inch floppy disk and ran on an Apple II computer. Today, it has a full-featured editing program with many sophisticated features and modes for both print and film media. To create a new layer, click the plus sign. A new layer will appear at the bottom of the Layers palette. You can name the layer. You can add raster graphics to the new layer by clicking on the Layer icon. To add graphics to the new layer, open a graphics file. You'll find an Open dialog box. What's New in the Photoshop CC 2018?

**Q:** Changing a div's color on mouseover I need to change the css background color on mouseover in the same way as a banner, and then revert back on mouseout. The only way I could figure out how to do this is by recording a keyframe animation and then looping it, but I want to know how to do it with just css and jQuery. Thanks for any help! **A:** This should do it with plain CSS: If you want to animate it: `div { background: red; border: 1px solid black; color: white; transition: 1s; -webkit-transition: 1s; -moz-transition: 1s; -o-transition: 1s; } div:hover { color: red; }` **jsFiddle example**  $x = 3 * x + 10$ . Let f be  $w(-3)$ . Let o be  $((-68)/(-51))/(12/9)$ . What is the smallest value in 1, o, f? f Let w be  $(2-0)*((-232)/16 +$
