Kirisun Programming Software Pt8100

1cdb36666d

Hi all. I require programming software for the Kirisun PT8100-01 Thanks.. Kirisun, Kirisun PT-8100 KSP-8100 V2.04, andre5098 .A-State wanted New Orleans to pay the \$5,183.85 balance on defensive lineman Za'Darius Smith's monthly \$750 locker-room fee, while members of the Southland Conference Council of Presidents said it is an administrative fee. The council's board of directors voted 5-0 on Saturday to allow A-State to bill New Orleans, while the Southland Conference trustees voted 6-0 on May 2 to allow A-State to bill the fees. Smith was released from the New Orleans Police Department (NOPD) Dec. 18 and A-State had the right to bill the fees. Smith had his monthly locker fee waived for a month last year when he was suspended for the opening round of the basketball tournament. A-State had requested an exception to pay him for the December 5 workout fee from the fee schedule last year and the February 2 workout fee from January. Smith's locker room fee increased from \$250 to \$750 for the 2012-13 academic year. A-State's policy states: "The Athletic Department may contact the head coach for the requesting conference regarding the requesting team's room, training table, running boards and lockers, if the team has been requested to pay any room, training table, running boards and lockers, other fees may be paid by the coach."Q: Java file recursion I'm having trouble understanding why this program is not behaving as expected. I made it so that the program reads in from a text file called notes.txt and stores the contents into an array (createArray()). Then I wrote a method that searches through the array for all the notes that have to do with diving. For example, my notes.txt file looks like this: 1) Mathematics is essential for a computer science major. 2) The computer uses electricity to process information. 3) Computers do not need batteries. 4) Computers can not run without power. Now the problem: If I type in the word 'diving' as the input, the program runs as expected and returns the entire string. But if I type in 'computer' instead, it should return the entire string, but instead, it returns just
