CAD is also popular in the construction industry and architecture in regions where the square meter is still the traditional unit of area measurement. For this reason, the AutoCAD program (more precisely, the DWG (drawing) or DXF (drawing exchange format) format) is used in the practice for designing. In addition to the intended use, CAD has found many other uses, such as for teaching children how to read and write, for instruction, for land-use planning, and for structural analysis. In Europe, autodesk-cad-desktop-2017 was used by millions of students for drafting math classes. In accordance with the Research, Development, and Innovation (R&D&I) policy, in 2011, the US Army contracted with the Autodesk Corporation to conduct a study of the feasibility and benefits of the Autodesk's CAx-Core Architecture Program (CAx) in support of the Joint Land Component Automation (JLCA) program. In 2012, Autodesk acquired Corel Corporation's Raster Graphics division. Some of the Raster's technologies, most notably CorelDRAW, were integrated into AutoCAD and later transferred into Autodesk DWG. In 2017, Autodesk bought CrossPro for $335M.
