I got the challenge (ticket), but i didnt get any reply or ticket for the issue (priority). i uploaded a ticket again, still i got another ticket and also i got “i want to add my money”.
1, for a particular file type how can i download that file to the computer?
2, can i use a file having name *.tar.gz also, if yes 3, can i download the file which name is *part* of *.part.tar.gz 4, can i download the file which name is *.part *? 5, if i do as mentioned above and name of file is whatever1.part and name of file is whatever2.part, than name of file which is whatever1.part+whatever2.part will be? 6, how to download from a webpage url without downloading 7, if i did try to download.exe file but

now i dont have the link to it i dont know what to do, i just want to download it and if the later said “you need to install that software, then only you can use that software” i just want to skip that step and to download it only. i tried this way but i got the message “i was not able to install the file because it is a windows executable file and you need to install that software before you can use that software”. 8, if someone had made a special software which can auto download and extract.exe files and the user just clicks “download” and downloads it (he dont have to install that.exe file). can you please guide me? 9, how can i download a file from a particular website without downloading it. for example, i download a file from “futonsweath.com” webpage. how to

get that file without downloading
and store it? My first post, so be
