
Foison C24 Vinyl Cutter Drivers Zip

check the ou, it may be a conflict in the usb port. change usb port number using the configuration and options interface in the easycut software to the same value as you are using. you can also try using a different usb cable if you have one. download a program called easycut studio. it's worth the download. it's designed to work with the foison c24 and c32. there is no driver for the c24. there are no drivers for anything included with the foison c24. so i recommend using easycut studio. there is a windows version and a mac version. go to the easycut studio website for a download link. go to the easycut studio mac download page. go to the mac download page. bummer. you need to open a serial port on the c24. you'll need to start up serial connectivity (from the mac download page). set the baud rate to the same value as you are using on the foison c24. the setting is in the serial connectivity application. @tibbs, i see the foison web site mentions that you can buy blades with extra holes for the cutting machine. i think those blades will only work with the c24. the manufacturer does not offer blades for the c24. they do offer blades for the c32. the c32 has a much different cutting mechanism. hi, sorry to hear that you are having trouble. first, check out this website: <http://www.vistecuts.com/help/technical-questions/> is it possible that the cutter is faulty? does it print or cut right away? do you have the proper driver? if there is a problem with the cutter, the manufacturer should be able to replace it. if the problem is with the software you are using, there is a place to go to and get support from a real person. the cost varies based on what kind of support you need.
